EDUCATION

University of North Carolina at Chapel Hill — Chapel Hill, NC
Bachelor of Science in Computer Science and Applied Mathematics — *May 2025*
Relevant Coursework: Machine Learning, Computer Vision, Probability, Computer Systems and Organization

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, MATLAB, HTML, CSS
Frameworks and Libraries: Node.js, Express, Flask, Junit, Pandas, NumPy, Matplotlib, OpenCV, PyTorch, TensorFlow
Developer Tools: Git, Docker

Professional EXPERIENCE

Applied Machine Learning Research Assistant — June 2024 – May 2025
School of Medicine – University of North Carolina at Chapel Hill — *Chapel Hill, NC*

- Leveraged expertise in literature review, **statistical modeling**, and software development to provide **data-driven** solutions for the rs-FMR Lab at UNC School of Medicine, improving workflow efficiency and ensuring data integrity.
- Aided Development and implementation **deep learning** classification models to accelerate diagnostic processes and provide enhanced patient insights through **neuroimaging** data.

Data Science at Scale Intern — May 2024 – Aug 2024
Los Alamos National Laboratory — *Los Alamos, NM*

- Designed and developed a Python library for multi-method image quality assessment using **PyTorch** and **OpenCV**, supporting the assessment of **data reduction** on visualization of large-scale **scientific data.**
- Implemented ~22 pixel, structural, **statistical**, and **deep learning**-based full-reference and no-reference quality metrics to quantify image quality and compute image quality maps, through extensive **literature review** and **data-driven** assessment of metric significance.

Research Intern– Machine Learning for Computational Chemistry — May. 2023 – Aug 2023
University of Massachusetts at Dartmouth — *Dartmouth, MA*

- Accelerated the identification of redox-active materials for non-aqueous redox flow batteries through comprehensive **literature review**, d**ata analytics**, and **machine learning** techniques.
- Conducted **exploratory data analysis** and preprocessing on extensive computational chemistry datasets to elucidate feature importance.
- Implemented and optimized ensemble regression models on a dataset of ~260 molecular structures, identifying molecules for solubility optimization and analyzing ~20 cation prospects from a ChemBL dataset of over 500 molecules.

Relevant PROJECTS

Image Caption Generator | *Python, TensorFlow, Flask, HTML, CSS, JavaScript*

- Designed and developed a **deep learning** full-stack application using **Express** and **Node.js** to encode image input from users and generate image-based captions.
- Achieved image feature encoding by utilizing a pre-trained convolutional neural network, alongside developing, training and validating a Long Short-Term Memory recurrent neural network for caption generation, on a dataset of ~ 3000 labeled images using **Keras** and **TensorFlow**

AI News Article Reliability Predictor | *Python, TensorFlow, Flask, HTML, CSS, JavaScript*

- Developed and deployed a **machine learning** based web application using **Flask** and **Python** to provide real-time classification of news article reliability
- Employed **natural language processing** techniques such as text tokenization and vector embedding to preprocess sequences of news article data for training and validation of Long Short-Term Memory (LSTM) **recurrent neural network** on a test dataset of over 40,000 news articles.

Volunteer and Leadership Experience

Senator | Student Government Association | Wake Technical Community College

- Led and organized monthly networking events to facilitate integration of new students to institution.
- Advocated for well-being of students by being their representative in meetings with the institution's president.

Honors Program | Wake Technical Community College

- Collaborated with processor on developing an application for visualizing sorting algorithms.
